Yeti Tilefold Range

Yeti tile fold incorporates a full surrounding flashing for water proofing to bond to and tile over. Our tile fold drainage system is perfect for showers, end of trip facilities and wet rooms. We start by taking an understanding of the site setup including substrate and tile choices. Once the materials are confirmed we can design a system which works with your bathroom setup. Combine our tile fold system with a selected heelguard grate type or with our tile insert trays. The Yeti Tile Fold system makes it easier for contractors to create a water tight, effective installation and achieve a superb seamless installation with superior aesthetics.
