## Yeti Slimline Range

Yeti Slimline is designed for superior drainage in depth limited installation areas. Our slimline range can be manufactured with a flat base, v base or cross break fall for shorter runs. Yeti slimline can be custom made with seal welded end caps and outlets in positions. We take the time to understand your project and send through a detailed product drawing prior to commencement with manufacturing. For longer runs we supply our slimline products as modular kits all made to length for rapid installation on site. Yeti Slimline is designed and manufactured for seamless installation and superior finish and drainage results.

## Channel Base Option

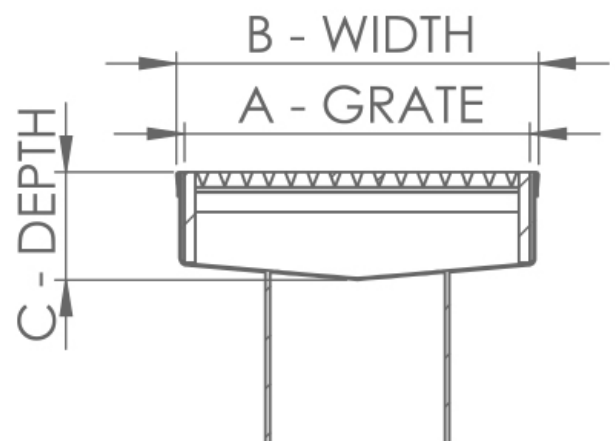

## Specifications

Yeti Slimline Profile Options			
Dimension	A	B	C
